

CLAIMS

Having thus described the invention what is claimed as new and desired to be secured by Letters Patent is as follows:

1. A workpiece positioning tool comprising:
- an L-shaped, generally flat base member, said base member having first and second legs, said first and second legs having front edges and back edges, said first and second legs having unobstructed leg ends and unobstructed front edges,
 - a first sidewall connected to said back edge of said base member first leg,
 - a second sidewall connected to said back edge of said base member second leg, said second sidewall having a first end adjacent said first sidewall and an unobstructed second end, and said first sidewall having a first end adjacent said second sidewall, and an unobstructed second end,
 - a void extending upwardly from said base member and between said first and second adjacent ends.
2. The workpiece positioning tool as claimed in claim 1 further comprising a plurality of in said base member and said first and second sidewalls for securing the tool to a workpiece.

INVENTOR: JEVONS, et al.
TITLE: THREE DIMENSIONAL SQUARE TOOL

3. The workpiece positioning tool as claimed in claim 1 wherein the angle formed by said first and second legs is 90 degrees.

4. The workpiece positioning tool as claimed in claim 1 wherein the angle formed by said first and second legs is 60 degrees.

5. The workpiece positioning tool as claimed in claim 1 wherein the angle formed by said first and second legs is 45 degrees.

6. The workpiece positioning tool as claimed in claim 1 wherein the angle formed by said first and second legs is 30 degrees.

7. The workpiece positioning tool as claimed in claim 1 wherein the angle formed by said first and second legs is 20 degrees.
